Dates On Coins

Bankers Want To Stamp Future Coins With Current 1964 Date

DATES have appeared on coins since 1450. Coins of the United States have been dated by year of issue for every coin authorized since the first coins struck in 1792.

The American Bankers Association wants to eliminate this 500 year old worldwide tradition and 172 year old precedent in the United States.

The Executive Council for the A.B.A. issued a resolution at their spring meeting, April 21, in White Sulphur Springs, Va., to continue dating coins with the same date.

The resolution called for the continuation, presumably of the date 1964, on all coins minted for the next several years. The purpose of this action is to discourage the large holding of current date uncirculated coins.

As such, this resolution on the part of the largest banking organization in America is aimed directly at coin investors and collectors.

In a separate action an editorial in the New Brunswick (N.J.) Daily newspaper, calls for the continued dating of coins also. This was brought about by a shortage of Kennedy half dollars in that area.

The editorial writer and the executive council of the A.B.A. may not have realized what they are asking for is illegal under our present laws.

The New Jersey editorial writer at least said this "might require the backing of Congress."

It would require not only the backing of Congress, but a change in legislation, the passage of a complete new law, and therefore, a change in the Code of Federal Regulations.

It is quite clear that under present laws, a date of the year of issue is required on all U.S. coins manufactured by U.S. mints.

There is no precedent in United States coins where one date has been used for a number of years. There are some interesting numismatic points this brings to mind, however.

In the early history of our mints it was common practice to change the date on a die which was still in working condition. This is the reason why we have so many overdate varieties.

Overdates, while common in the nineteenth century, are rare in the twentieth century, but did occur as the 1918 over 17 nickel and quarter will attest.

The mints, while bound by law to manufacture coins dated only

during the current calendar year, are not so required in the case of foreign coins struck for foreign governments.

An early case of this was the 1883 coinage of Hawaii. These were struck at San Francisco, however, only the quarters and half dollars were actually struck during 1883.

The dimes and dollars—while dated 1883—were actually struck in 1884.

A more recent case is the Liberia coinage dated 1958 while actually struck in 1959.

To strike a coin intended for regular circulation in the United States which is not dated the year in which it is made is illegal, however.

During the last working day in the calendar year all dated dies are destroyed at the mints.

Some of the top mint officials witness this destruction. They are quite meticulous in this procedure since they must certify to this requirement.

Signed certificates are presented to the Bureau of the Mint all dated dies are destroyed during the calendar year.

No more is it possible to retain a die just because it is still in working condition. Many dies manufactured for use during one year may not even be used at all—must be destroyed along with worn dies.

Dies of the coming year may be made in December in anticipation for use in January. In fact, die-setters at the mints frequently work on New Year's Day getting the coinage presses ready for production on the first working day of the year.

The purpose of dates on coins is to identify the year of issue. Mintmarks evolved from a system of coiner's or mintmaster's marks. Purpose of these was to identify the issuer.

With a combination of date and mintmark it pinpoints the responsibility of who issued the coins. Mintmarks date back to early Roman Republican times.

The resolution of the American Bankers Association may cause us to ask, "Are dates and mintmarks still a necessity on our coins?"

Unquestionably so. The bankers are asking to abandon 500 years of tradition and precedence. They are asking us to abandon responsibility of issue.

What they are asking, in effect, is to abandon control of coins by date of issue.

Their action has only taken the form of a resolution. It is unknown whether they have approached Congress for the proper change in legislation to effect this resolution.

Stranger things have come out of Congress. Let us hope that thinking minds will prevail in this situation.

Let's analyze the situation one step further. Why was this resolution passed? Because of the coin shortage. Why, then, does the coin shortage exist? Because of lack of production facilities at the existing United States Mints.

The coin shortage, therefore, is only a temporary situation. The solution is expanded coinage facilities. The House of Representatives has recently passed a bill authorizing appropriations for a

new mint to be located in Philadelphia.

The bill now goes to the Senate. If the bankers can be patient, new coinage facilities will be available in a few years.

The A.B.A. spring meeting also generated the following resolutions of interest to the coin field:

(1) They recommended to defer minting of any silver dollars until other coins are in adequate supply.

(2) They recommended to make maximum use of private coinage facilities while government's mints are overburdened.

(3) They recommended to curtail the practice of minting coins for foreign governments.

(4) And they recommended the government take a firm stand to hold the price of silver at its present level of \$1.29.

It was learned from Bureau of Mint officials that coinage for foreign governments has already been curtailed. Recent requests from the Philippines and Ethiopia have been turned down.

The Bureau of the Mint also takes a dim view of having private facilities manufacture coins. They have a monopoly in this respect and want to keep it that way.

Undoubtedly we will hear more requests from people and organizations—probably not as large as the A.B.A.—who will think they have solved the coin shortage problem by continuing to date coins of the future years 1964.

While coin investors and collectors do take a large number of coins from circulation, or more aptly, before they reach circulation, they are not the major cause of the coin shortage.

And while dating all coins of the next few years with "1964" this will not lessen the amount of money invested in these coins. Collectors and investors pour a certain amount into their holdings each year.

If they are buying current uncirculated coins, they will buy just as much in three years total, or three years separate, despite whether the coins are dated "1964" or 1964, 1965 and 1966.

The solution proposed by the American Bankers Association is an attempt to solve only a portion of the problem and not the overall problem at all.

If placed in action, which would be difficult to do on the first hand, it would be ineffective on the second hand.

Lively Roosevelt Dimes

Inexpensive, Unweathered Series Has Lots Of Action

By Christian F. Verbeke

A LIVELY and dynamic series! Unweathered and of recent vintage, the Roosevelt dime supplants all other coins in relative availability. It has the distinction of commanding as yet the lowest retail price among all other contemporary coin sets.

Indeed, a circulated single set can be acquired for \$8.50, if the collector does not have the patience to compose it from change. A BU single set retails for approximately \$82, well within reach of the average collector.

The Roosevelt dime was designed by John R. Sinnock, well known for the Franklin half dollar released in 1948. Total mintage 1963 inclusive is 4,317,214,603; this compares with 2.677 billion for its predecessor, the Mercury dime.

The Roosevelt dime was released in 1946 with an initial production of 344 million pieces. This buoyant start was to continue with extreme regularity with the only exceptions of 1949, 1950 and 1955.

Low Mintage 1949 Dimes

The low mintage of 1949 can be attributed to decreased demand for dimes as a result of steep production in previous years. In fact, one has to turn back to 1938 to find a comparable low mintage. All other years between 1939 and 1945 show mintages of 100 million and up.

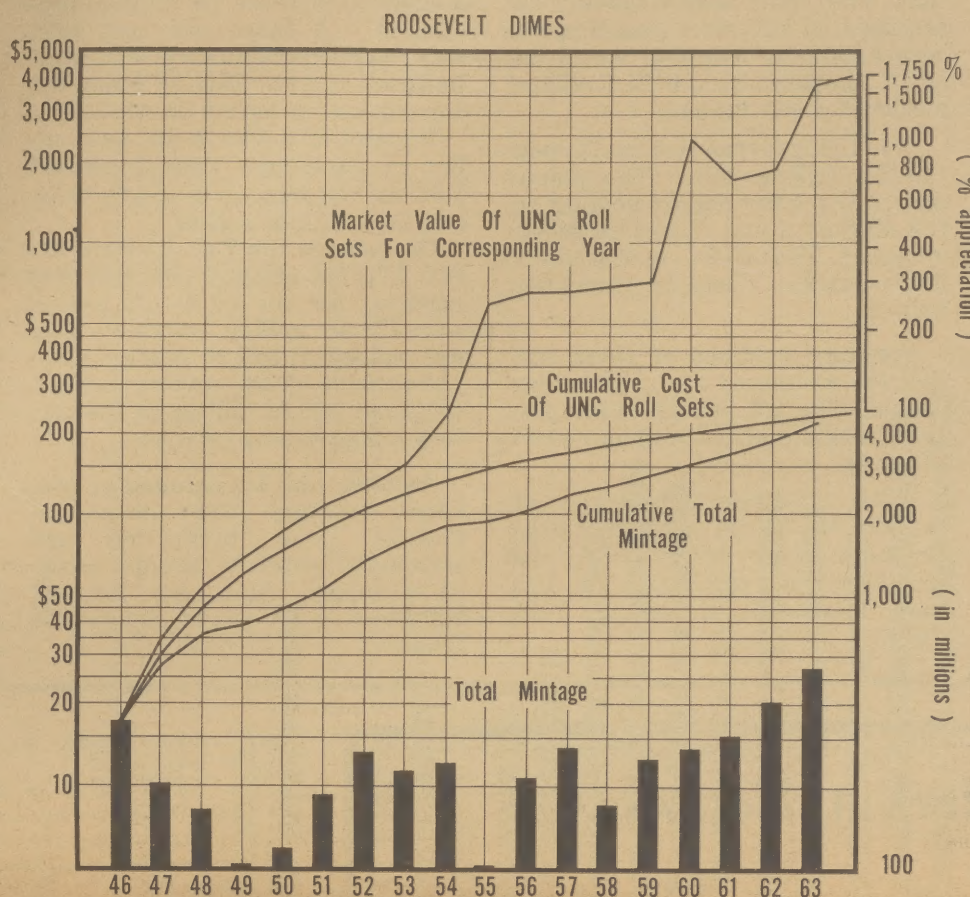

Mintage in 1950 edged somewhat higher but production remained sub-average. It should be remembered that during the transition period 1949-50 the U.S. mint had embarked upon a vigorous program of technological improvements, i.e. new melting and rolling equipment, a new type of water-cooled mold, and new annealing equipment.

By 1955, after four years of increased Roosevelt dime production, mint output dropped to the 45.2 million mark for all three mints combined. This was also to be the last year of coinage operations in San Francisco.

From 1956 to date, production expanded rapidly, averaging 200 million dimes yearly, until 1961 when average production exceeded 300 million, to reach finally 545 million by 1963, an unsurpassed record high for any dime series.

The year 1964 seems to evolve on a quieter note. According to the March cumulative mint report 10,780,000 Philadelphia dimes and 143,600,000 Denver dimes have been produced. These are modest figures by any standard.

A representative sampling of circulated dimes in bag quantities reveals that a complete set of Roosevelt dimes can be readily completed with the exception of 1949-S and 1955-PDS. This is fully reflected in the low price of circulated single and roll sets.

Circulated Gaining Popularity

Collection of the Roosevelt dime in circulated condition has not been popular until recently. In fact, this lethargy is noticeable for BU specimens as well.

This phenomena of collectors' apathy is often attributed to the diminutive size of the coin. Recent price action suggests a change in

this basic attitude.

As other coin series move out of the reach of beginner collectors, because of high prices, it is inevitable to see more attention focused on Roosevelt dimes.

This last week, Roosevelt dimes staged a healthy price advance, the Space City average composed of 10 representative BU rolls mov-

Year	Mintage	Retail BU Roll	Remarks
GROUP I			
1949-S	13,510,000	\$700	Second smallest mintage, scarce
1950-S	20,440,000	575	Low mintage, scarce, good demand
1949-P	30,940,000	450	Reached objective
1952-S	44,419,500	175	Actively on 'buy' lists
1948-P	74,950,000	150	Reached objective, stable
1951-P	103,937,602	82	Reached objective
1947-P	121,520,000	55	In alignment with remainder group
1946-P	255,250,000	22	Coming back in demand, some upside potential left
GROUP II			
1955-P	12,828,381	\$130	Lowest mintage Roosevelt dime, attractively situated
1955-D	13,595,000	77	Low mintage, reasonable upside potential
1955-S	18,510,000	60	Relatively low mintage, equal potential to 1955-D
1954-S	22,860,000	55	Steep price advance recently, ultimate objective higher
1946-S	27,900,000	72	Recent price advance, higher objective
GROUP III			
1962-P	75,668,019	\$ 10	Long term potential, would not follow sharp price advances
1960-P	72,081,602	10	Long term commitment
1959-P	86,929,291	10	Long term commitment

ed into high grounds reaching 732, up 21.5 from the previous week.

This price action followed a consolidation move which had been in effect since mid-February. The present price move could well carry to the 800 level before showing signs of exhaustion. In fact, from a purely technical point of view the objective is 810.

The advance of last week is highly selective however, analysis of the market structure reveals that 10 issues advanced, while 35 remained unchanged and three declined.

Ten Year Price Study

How would the investor in Roosevelt dimes have fared in the last ten years? Assuming one had acquired one BU roll of each mint since 1946 to date the cost of the program would have been \$240, provided the rolls were acquired at face value or very near face value.

Based on strict retail prices this BU roll set is worth \$4,000. If liquidated through a dealer the collection would bring about \$3,400. This price performance suggests a profit of 1,750% could have been realized from a systematic investment in Roosevelt dimes.

Oddly enough the first seven years of the investment scheme proved rather frustrating. Not until mid-1953 did the set show real profits; the investor would then have had \$135 invested with a liquidation value of \$245.

While of modest proportions, this profit was actually self-generating and did not require any investment decision - making or multiple transactions.

1959 Price Advance

By 1955 the roll set price had advanced to \$600 or a 400% unrealized paper profit. During the four subsequent years the market remained at the same price level and afforded the investor to add to his commitment at prices never seen since.

In 1959 the Roosevelt dime market staged another advance into 1960. By then a BU roll set had risen to \$2,400 or a 1200% unrealized paper profit on a total of \$200 invested.

The years 1961 and 1962 proved disappointing while the price of the roll set drifted to \$1,700. Beginning 1962 the Roosevelt dime market staged another major advance which carried prices to their present \$4,000 level for the BU roll set.

This performance is not unusual, most series have outperformed dimes in fact. Nothing suggests the past performance can duplicate itself, in the next 18 years.

One fact emerges clearly, and can be correlated with more recent Roosevelt dime dates i.e. 1956 to date; the first seven years of the series showed a slight price appreciation approxi-

(Continued on Page 27)

An Editorial

Those Silver Dollars Are Historical Relics

WITH the halt of the distribution of silver dollars from the U.S. Treasury, 2.9 million coins have become "frozen" in the Treasury vaults.

The future disposition of these silver dollars remains uncertain and clouded. Regardless of the outcome, however, the ultimate result should prove profitable to investors in silver dollars.

Here are the possibilities:

(1) The government could continue to hold the coins. This would have no drastic effect on the present silver dollar market. Coins held in the public's hands would react to normal supply and demand factors.

(2) The government could release the coins by auction, or over-the-counter sales as in the past.

Here the coin market would show the same reaction as in the

past four months—rapid absorption. The coins would quickly be acquired by investors and dealers. The additional supply would be small compared to the 25.4 million absorbed since January 1.

(3) The government could melt the 2.9 million coins. The potential of any more dollars coming on the market would therefore be eliminated. The effect on the silver dollar market would be extremely bullish.

Treasury holdings of silver bullion are estimated at 1,542 million ounces. The 2.9 million silver dollars contain only 2.2 million ounces of silver.

Little economic importance can be attached to the silver contained in these silver dollars when one considers this percentage is less than one-tenth of one per cent (.07%).

Recent silver statistics suggest a modest increase in mining production. A three per cent gain was recorded in January. This was, however, a 19% decline from the corresponding period in 1963.

Imports of silver in ore and bullion in December, 1963, increased 1.32 million ounces. Exports dropped 5.94 million ounces.

On balance the U.S. imports silver. The net amount (imports less exports) for the 12 month period were 27.58 million ounces. This was valued at \$27.26 million, compared with 63.30 million ounces, valued at \$59.34 million in the corresponding period of 1962.

Against this background of still ample Treasury silver stocks, increased silver production and seemingly plentiful foreign sources of supply, the case for real tightness in the silver situation is frail.

Price action in the most distant futures on Comex would seem to support this theory. January, 1965, futures contracts are trading at \$1.30 bid, close to the life of contract lows, and only at seven-tenths of one cent premium over the fixed price of \$1.293.

The nearby June delivery is now trading at \$1.2929 per ounce, in effect below the official government selling price.

It can thus be unequivocally stated, the remaining 2.9 million silver dollars in the U.S. Treasury do not materially affect the present alleged silver predicament.

As such, the destiny of the residual silver dollars in terms of finance or economics becomes entirely a matter of academic and numismatic interest.

For the numismatist, the silver dollar issue is important. At stake

(Continued on Page 5)

Coin Market Report

Compiled by the B. Max Mehl Co.

WE have just returned from the Kansas City and Metropolitan New York coin shows. The Kansas City show was far more active for rolls and proof sets than New York.

There was a strong demand in New York for single coins. Dealers there were pleased

with the final result of this well organized show.

The market remains strong with the demand steadily increasing for nickels, dimes and half dollars. Nickels and dimes are moving very well and should show considerably higher price changes within a short

time. The 1946-S and 1947-S quarters are very much in demand. Prices for these items increased about 20% over last week.

Silver nickels are particularly strong in demand with very little offered for sale there-

fore bringing prices up to a higher level again.

The 1950-D nickel is steady at \$925. We anticipate another rise in this coin as soon as the present supplies have been exhausted.

Dimes are very active. Prices of many dates are considerably higher over last week. A further strengthening is anticipated after the demand increases and less supply is available.

Half dollars are selling very well. Very few price changes have taken place during the last few days in halves. The single complete sets are very popular and anything offered over the teletype is immediately bought up at its present bid price of about \$175 to \$180.

Silver dollars are showing a good volume for almost all dates. The Carson City mint dollars are the most popular at present. The strongest demand

is for the seven over eight (7/8) tail feathers with a considerable price increase of \$30 over last week.

Proof sets continue to be in demand. The 1964 is very active with a bid of \$7 to \$7.50.

There is a strong demand for circulated rolls and Canadian proof-like sets. With the Canadian mint having cut off their delivery, we anticipate the 1964 series to increase in price in the near future.

All of the Canadian sets are very popular; many investors show investment preference for Canadian proof-like sets over United States proof sets.

Business reports in general are very optimistic and, of course, this must reflect on the coin market. More and more investors turn towards rolls and proof sets for either short or long term investments.

Popular Lincoln Cents

Double Die, Small Date Varieties Add Interest To Cents

By Russell K. Brown

FOLLOWING the issuance of the zinc coated steel cents in 1943, shell case copper was used as a source of metal for 1944 and 1945 cents.

During this period several mint errors occurred. Strikes were made of the 1944 cent on zinc-steel planchets and several 1943 cents were struck on copper planchets.

No 1943 cents were intended to be struck in copper by the mint. The publicity which occurred in the press about this variety causing a large number of altered dates and copper plated cents to be made.

Collecting Oddities

Oddity collecting has increased manifold in the last three years due to the Lincoln cent. With a mintage of hundreds of millions each year it is plausible minor variations occur.

Oddity catalogs list hundreds of kinds of errors. These range from filled dies and clipped planchets to multiple striking and off metal coins.

There are so many Lincoln cents struck of each issue that collecting normal specimens offers little challenge. Collecting oddities places an element of difficulty in an otherwise lackluster series.

From the late forties to the present, the mints of the United States have poured out thousands of tons of Lincoln cents. Seldom has the year passed that at least a half billion cents have not found their way into the stream of commerce.

Assembling a current set (1941-1964) or a Memorial set (1959-1964) takes little more than an afternoon's work. Except as a pleasant reminder of a small personal accomplishment, the set has little value, either as a collection or as an investment.

New Memorial Reverse

In 1959, the sesquicentennial of Lincoln's birth, the reverse of the Lincoln cent was changed from the 50 year old wheat sheave design to one depicting the Lincoln Memorial in Washington.

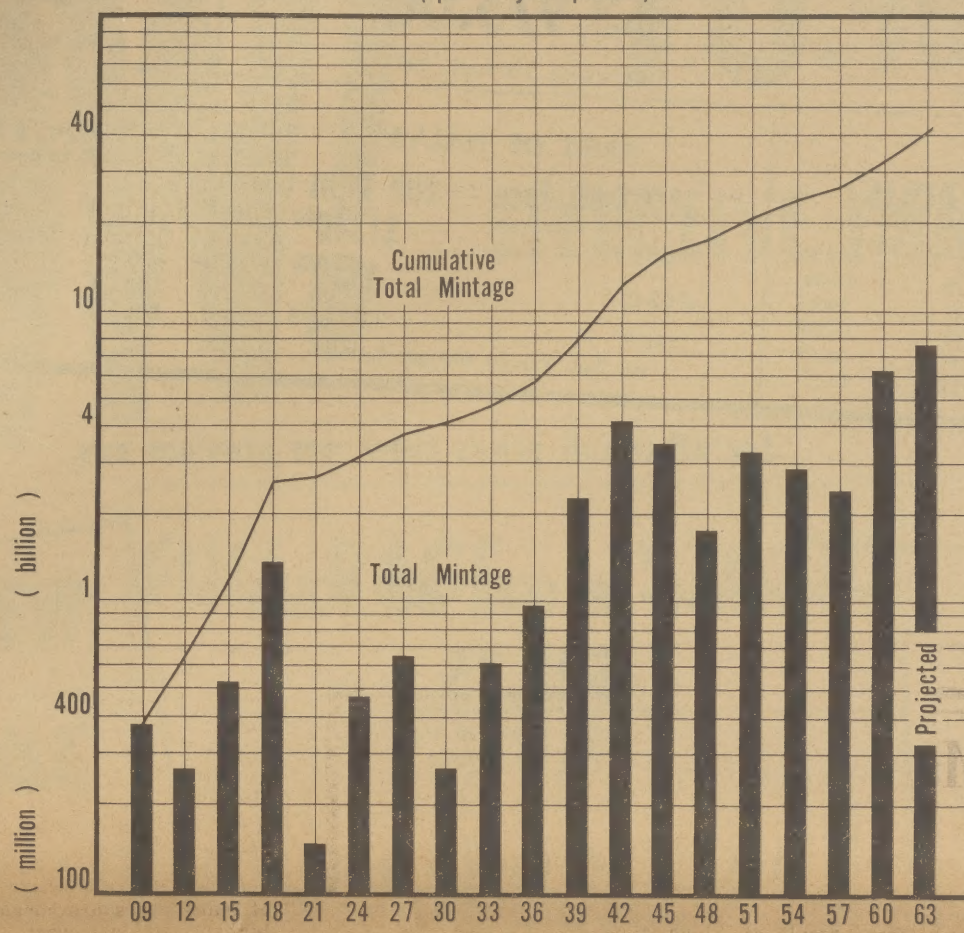

The new reverse was designed by Frank Gasparro. Mr. Gasparro was born, by odd coincidence, in 1909, the year of the first Lincoln cent.

The change to the new reverse was the recommendation of a committee headed by Kentucky Senator John Sherman Cooper. President Eisenhower promptly approved the move making possible the introduction of the new reverse in 1959.

After the trouble caused by the inclusion of Victor D. Brenner's initials on the original cent, it is strange that this cent is one of the first to bear the initials of two men.

Along with the "VDB" on the obverse appears the "FG" of Mr. Gasparro on the reverse.

LINCOLN CENT PRODUCTION
(per 3 year period)

Double Die Cent Story

One of the oddest coins to come out of our mints is the 1955 doubled die. This coin, along with the 1960 small dates provided the only valuable coins in the modern Lincoln cent series.

When creating the dies for the

Philadelphia cent of 1955, one of the working dies was impressed twice by the master die. The resultant double impression die was used for the production of an unknown number of specimens.

After being included in various albums and price catalogs, it took

on an extremely high value. Currently selling for \$375 in uncirculated it is sad that such an expensive coin must be included in a set with as small a value as the Memorial series.

Small Date Problems

It was decided, late in 1959, to modernize the appearance of the cent; specifically to reduce the size of the date slightly. In January, 1960, new dies with smaller figures came into use.

It was soon discovered at the Denver Mint the smaller figures filled up with bits of metal in the stamping process. It was decided that it would be wise to revert to the larger date.

Philadelphia had just started manufacturing the cent when the complaint was received from Denver. Both ceased cent production and new dies were prepared.

Several coin dealers, tending their funds in readiness for the acquisition of the new coinage, were able to acquire the majority of this variety of the 1960 cent.

In possibly the first of the modern day promotions the price of the Philadelphia version of the small date cent was run up to \$25 per roll.

The price then sagged, followed by unloading of stocks at reduced prices. However, the small date variety was included in albums and catalogs. This guaranteed the collectibility of the variety and initiated the high prices they now command.

The small date varieties are extremely cyclical in price. They regularly dip as much as 15% and then, in a rush, recover their loss and add another 20% to their price.

On the two major cycles of the small date 1960-P in the past two years, it was possible to buy in the low \$200's, sell in the \$400's, buy back in the low \$300's and sell at the recent price of over \$400 per roll.

This is one of the few rolls which even an amateur, if he watches the market very carefully, can make a good return on a short term position.

There has been much discussion just how many of the small dates were produced. Cut off dates from January 14, 1960, to as late as April 1 have been advanced. This resulted in an enormous disparity in calculated number minted.

The only safe statements are: (1) There were many more Denver small date cents made than Philadelphia; and (2) There are many of the small date 1960-D in circulation, whereas almost no circulated Philadelphia small dates exist.

Probably the best guess is: there are five to ten times more 1960-P small date variety. If so, it indicates the Denver version may be underpriced.

Silver Dollars ...

(Continued From Page 4)

is the sacred principle of conservation of our national heritage. No one can deny that coins of 75 years ago, particularly from institutions no longer in existence—i.e. the Carson City Mint—are recognized heirlooms.

These items from an era long gone, have de facto gained status of public domain. As such they belong to the American public as much as the Lincoln Memorial, the Capitol, or the Statue of Liberty.

Public domain does not mean license or option for profiteering. It does not imply items earmarked for private ownership to the highest bidder.

It means that a definite amount of rare U.S. coins is now the collective and indivisible property of the entire U.S. population.

It means that the U.S. Government—by definition public servants of the people—have the sacred obligation to collect, conserve, and safekeep these coins for transmittal to generations of Americans to come.

In the broadest sense, this task of safekeeping can be delegated to public, academic and private sect-

ors. For example: municipal and national museums, scholarly collections, academic institutions, national foundations, and collections, etc.

An alternative solution is keeping the remaining silver dollars in the Treasury reserves as continuous backing for silver certificates. With proper guarantees, these coins cannot be melted down or otherwise disposed of.

More acutely than ever, the necessity for the numismatic community to gain proper recognition and representation in Washington becomes apparent at this venue.

The estimated eight million coin collectors in this country constitute a formidable lobby, it is only equitable that they be heard.

The issue is one of cultural interests, maintaining our national heritage for the preservation of historical relics for future coin collectors.

The government should not melt the silver dollars. Instead they should accept their responsibility as custodian for the remaining silver dollars. C. F. V.

MacARTHUR PESO AND HALF PESO

With the recent passing of General MacArthur, already there are plans to strike commemorative medals in his honor. The Philippine government was way ahead of us, in 1947 as a tribute to their liberator, two commemorative coins (peso and half peso) bearing his portrait were struck at the U.S. Mint in San Francisco.

The coins bear the date 1947 with the S-Mint mark above the date. Only 100,000 pieces of the one peso were struck and 200,000 of the half peso pieces were

struck. We consider them to be greatly under-priced in relation to the small quantities minted. This coin should definitely be a part of every foreign coin collection, and we expect the day to come when they will be listed in the Guidebook of U.S. Coins along with other Philippine issues. The 1947-S Peso and Half Peso MacArthur coins belong in every U.S. collection as a tribute to a great American General. It is our belief that these coins will not be too plentiful in the very near future.

We offer you this set in plastic

We anticipate prices for rolls and proof sets will surpass all previous highs during this year.

We know a number of investors who have purchased a large quantity of uncirculated rolls during the past few weeks. All these items will be held for

a number of years.

They will not, therefore, be available to either dealers or other investors. It is reasonable to believe other dealers encounter the same situation. This, then, creates a shortage in supply, drives prices up

higher, and at the same time entices others to buy the same type of material.

All complete roll and single sets are very much asked for. We have always believed any item that can be sold as a single coin would prove itself to be a good investment in quantity.

This belief is based on the simple fact that the number of collectors is increasing by leaps and bounds. What does the collector buy? Single coins.

The entire market is in a state of great optimism and far larger business is anticipated during the next few months. This is the opinion not only of us, but by most of the other dealers as well.

Whitman, publishers of the Red Book as well as the popular 35c line of albums, is evidently unable to keep up with the demand for these books.

We have found it impossible to obtain any Red Books for resale. We have been sold out for the past three weeks in spite of having had a tremendous stock up to that time.

The same applies to the second album in the Lincoln cent series which are unobtainable from any jobber. We point this out only to show the tremendous increase in collectors which must have taken place during the past six months.

Coin publications are showing considerable increases in subscriptions again, demonstrating the increased demand by the public in general for coins.

Yellow Coin Book Monthly

MAY 1964

A COMPLETE GUIDE OF
**UNITED STATES
COINS**

1793-1964

By: — E. STRAUSS

A Realistic Guide Of U.S. Coins With Valuations
Covering All Conditions Of Each Date.

A Guide That Is Revised Monthly According To
Current Market Trends.

The "Yellow Coin Book Monthly" Is Used By
Thousands Of Coin Collectors And Dealers, Cross-
Country. It Represents A True Valuation Of U.S.
Coins And Is Very Useful As A Checklist. Besides
It Contains A Handy Grading Chart Which Is Con-
cise And To The Point.

108 JAM PACKED PAGES OF ESSEN-
TIAL COIN INFORMATION FOR THE
BEGINNER AS WELL AS THE
ADVANCED COLLECTOR.

PRICE
90¢

(Entire Contents Copyrighted 1964 — E. STRAUSS)

REVISED EACH AND EVERY MONTH!

Yellow Coin Book Monthly

THE LEADER!

A SELLOUT EVERY ISSUE
5 MONTHS IN A ROW!!!

THE YELLOW COIN BOOK MONTHLY is a must
for coin collectors and coin dealers alike. It is a super-
lative guide which lists all U.S. coins in every collect-
able condition and each and every listing is priced at
the current market prices.

Another important feature of THE YELLOW COIN
BOOK MONTHLY is the impact it has in the Numismatic
Field.

First of all the prices are realistic. All valuations are
up to the minute.

Secondly they serve as a guide to thousands of
collectors and dealers.

Thirdly it contains a "down-to-earth" chit-chat
column which is a monthly feature. In addition the
"yellow book" contains a sensible grading section that
actually takes you by the hand, guides you in grading
your coins.

Finally THE YELLOW COIN BOOK MONTHLY is re-
viewed and revised bringing you the prices of today
and not yesterday's or last year's.

This monthly list now contains grading instructions
or how to judge the points of wear on specific coins
of denominations.

Send 90¢ now for this month's book and we have
the utmost of confidence that you will like it so much
that you will immediately subscribe for a full year
(12 issues) at \$9.00 and thereby save \$1.80 (postpaid).

Only 90c Monthly

MEET A.N.E.'S NEW "7740"

A.N.E.

AMERICAN NUMISMATICS EXCHANGE

WHAT IS A.N.E.?

A.N.E. is a wire service exclusively for coin dealers. It has teletype connections in every major coin market in the U.S. and Canada. Currently 192 major coin dealers receive up-to-the-minute coin prices and information through the speed and absolute accuracy of a 22,000 mile Bell System Teletype Network.

WHAT IS A "7740"?

The IBM 7740 Communication Control System is the latest system in the Tele-Processing area and provides for the complete supervision of an entire communication network. It has the ability to simultaneously send and receive on up to 84 individual teletype lines. The internal speed of this programmed computer is 25,000 instructions per second. This is an example of the extensive efforts of A.N.E. to provide its dealer members with the best possible service and equipment.

WHAT A.N.E. MEMBERSHIP OFFERS YOU!

As a member you communicate with all other members in a matter of minutes. You enjoy the benefits of a larger marketplace, reduced phone bills, accurate record of all transactions and absolutely the latest coin prices and information which are received constantly.

APPLY NOW FOR JUNE INSTALLATION...AND SAVE!

The number of members in a Teletype Exchange determine the "tie-in" rates. Currently there are 192 dealer members so there is still an opportunity to sign up for June installation at the current low "tie-in" rate. Increase in "tie-in" rates will be:

Over 200 Members	\$ 250.00
Over 250 Members	\$ 500.00
Over 500 Members	\$1,000.00

APPLY FOR MEMBERSHIP TODAY...SAVE MONEY...AND RECEIVE THE ADVANTAGES OF THE IBM "7740"!

BUY OR SELL BU ROLLS AT TELETape MARKET PLUS 5%

BILL WILLOUGHBY
"Mr. I Predict"

Another WILLOUGHBY FIRST. Acting as your agent we will BUY or SELL BU Rolls at teletape market plus 5% brokerage. All orders executed at market at time order is executed . . . No longer is it necessary to chase rolls trying to "locate" at market price . . . The day of 20% to 50% spreads in BUY and Sell prices are in the limbo of the past . . . Today's market is a live market and the action is FAST . . . Buying rolls at prices that have large mark ups above teletape market can be DISASTROUS . . . With a 20% or more profit you could have to WAIT for a considerable time to break even on your purchases. Buying at MARKET gives you a built in advantage

— only a small RISE is necessary for a profit . . . More chances for INSTANTANEOUS PROFITS . . . when you buy at WHOLESALE.

We are COIN BROKERS — there's a wide difference between BROKERS and DEALERS . . . Brokers in all business enterprises work for COMMISSIONS . . . He BUYS and he SELLS coins for you, you pay him a SMALL commission to perform these services for you. Brokers may or may not be dealers . . . A BROKER is a SPECIALIST who works for you . . . A dealer has to add 20-40% MARK UP for the simple reason that he has INVESTED money in your transaction. Because the COIN BROKER does NOT INVEST money in your transaction, he is able to consummate your transaction at the MARKET plus a small commission . . .

Sorry we cannot handle orders for less than \$100.00 on commission basis — Postage and insurance added to all commission orders . . . Only our large VOLUME allows us to extend you this service — It will pay to use this service!

THE THEORY OF CONTRARY OPINION

Everyone at sometimes has heard THE THEORY OF CONTRARY OPINION mentioned. Life MAGAZINE discussed it in the issue of March 21st, 1949, 15 years ago, The Wall Street Journal carried mention of it a few days ago. While everyone has HEARD of this THEORY, I doubt very much if 100 readers of THIS AD have ANY UNDERSTANDING of the THEORY which affects you and EVERYTHING you do — socially, politically and economically EVERY MINUTE OF YOUR LIFE.

THE THEORY OF CONTRARY OPINION IS NOT NEW! Mackay laid a great deal of the ground work in his works "EXTRAORDINARY POPULAR DELUSIONS and MADNESS OF THE CROWDS" written 1885. LeBon and Freud wrote at great length on this subject matter around the turn of the century. Humphrey Neill, a great present day American who is no doubt greatly influenced by his research of these renowned authorities, has compiled a present day adaptation in his work "THE ART OF CONTRARY THINKING." Let's see HOW MUCH you understand of this THEORY OF CONTRARY OPINION that every day AFFECTS both your FINANCIAL as well as your political and social well being.

Can you answer these questions

CORRECTLY . . .

What is THE THEORY OF CONTRARY OPINION?

Why do CONTRARIANS buy LOW and SELL HIGH more often than any other group?

Why is it that when everyone THINKS ALIKE, everyone is LIKELY to be WRONG?

Why do too MANY PREDICTIONS cause FORECASTERS to be WRONG?

Why is the PUBLIC RIGHT more often than WRONG, yet WRONG when it pays to be RIGHT?

Why does the public NEVER resort to REASON, but is susceptible to SUGGESTION, DEMANDS, CUSTOMS and EMOTIONAL MOTIVATION?

Why is the INDIVIDUAL more INTELLIGENT than the public?

Why, in a democracy are we CONTROLLED by the thinking of the MINORITY?

Why has EVERY PERSON who made fortunes in the financial markets done so because he understood and used THE THEORY OF CONTRARY OPINION?

Is this statement right or wrong? The individual thinks with his emotions — the public thinks with its BRAINS.

Pick 100 of your acquaintances. How many can THINK correctly? Two? Ten? Fifty?

What is the difference between CONTRARY thinking and NEGATIVE thinking?

Why is it just as EASY to make FORTUNES today as it was fifty years ago?

Why does a MANAGED economy have to rely upon PROPOGANDA?

Why is human BEHAVIOUR fully as important as STATISTICAL?

Why does CONTRARY THINKING unquestionably help one in AVOIDING ERRORS in common judgement.

Why is it easier to be CONTRARY to general opinions, than it is to create ORIGINAL thoughts?

If you can answer these questions correctly, your INTELLIGENCE can be rated as being among those in the top two per cent of the total people in the WORLD. Yet they are relatively SIMPLE and are fully explained in THE THEORY OF CONTRARY OPINION, an adaptation of this theory as RELATED to the coin markets of TODAY. This is another MUST in "THE FORECASTER" series starting shortly. Subscribe today and do not miss a single issue.

We here at "THE FORECASTER" consider this theory so important we are having it written by THREE DIFFERENT members of our staff, each one setting it forth in his own light so that you may have not ONE but THREE

interpretations. If you want to be RIGHT more often than WRONG, we recommend that you do not MISS a single issue covering this subject. Most certainly in predicting the FUTURE, we must be able to EVALUATE what the

public is doing NOW and what is PROBABLY will do next. The ability to make these evaluations CORRECTLY is the THINKING that makes PREDICTIONS come true. My predictions, which have been AMAZINGLY ACCURATE in the past, have been based on THE THEORY OF CONTRARY OPINION.

No doubt the most successful persons in our economy and political-social life today are CONTRARIANS, whether they realize it or not. Forthcoming articles will finally tie this theory into our SEVEN ZONES OF ACTIVITY so that you may make use of these data which are INVALUABLE! SUBSCRIBE TODAY so that you will not miss a single issue of "THE FORECASTER", America's leading coin market weekly letter. "THE FORECASTER" . . . TEACHES . . . ANALYZES . . . RECOMMENDS . . . Why GAMBLE? When you can INVEST. "THE FORECASTER" can furnish you GUIDANCE that can help turn your LOSSES into PROFITS! Subscribe today and JOIN THE PROFIT PARADE!

INVESTOR ACCOUNTS ARE OUR SPECIALTY!

More national publications quote Willoughby as a coin investment AUTHORITY than any other coin dealer in U.S.A. We offer an entirely different plan for investors who can take "positions" of \$500.00 to \$50,000.00 or even more. We will buy at WHOLESALE and sell at RETAIL as your agent with only a small BROKERAGE FEE (5%) for acting as your agent. Where most advertised BU ROLL PRICES show an average SPREAD of TWENTY per cent, acting as your broker, we can buy these rolls for you at only a SMALL MARK-UP from the actual MARKET price. A built in PROFIT for you from the beginning!

Anyone can sell you a PACKAGE of rolls taken from their inventory which means you are buying at the TOP of the market! Willoughby allows you FULL DISCRETION on how your money is invested. We point out ROLLS we consider SPECIAL SITUATIONS and, on your direction, purchase these rolls for you at WHOLESALE PRICES plus a small brokerage fee.

Willoughby will gladly ANALYZE your present portfolio (BU ROLLS ONLY) and offer you his SUGGESTION of CHANGES that he considers to be to your advantage. This portfolio service is FREE with NO OBLIGATION. There is a time to BUY and a TIME TO SELL every roll. Every portfolio needs a SPRING CLEANING occasionally. Why not have America's foremost COIN AUTHORITIES advise you? We are PROFESSIONALS. Please enclose self addressed envelope with all inquiries.

Scared of robberies? Risking your LIFE by having large amounts of coins in your home or office? WHY GAMBLE? Willoughby offers to their clients FREE STORAGE AND INSURANCE . . . two of the biggest headaches in numismatics. Many of the LARGEST investors in BU roll market today use these FREE FACILITIES. All merchandise is FULLY INSURED and if your holdings are sizeable enough, we have our carrier issue you a LOSS PAYABLE certificate. Only Willoughby offers this MONEY SAVING service to investors!

We will handle your account for either LONG or SHORT term basis as you desire. If you have a TAX LOSS carry over you probably want SHORT TERM. If you are in a high income bracket we recommend LONG TERM, which means we sell nothing for you until after it has been in the account a minimum of 6 months, ten days—which allows for LONG TERM gains.

Our program is based on PROFITS THROUGH RESEARCH. We are continually probing the market for SPECIAL SITUATIONS with fantastic possibilities. If a roll does not have at least 40% potential on the upside in the next year we give it no consideration here. Our amazing record of predictions in the past gives us added confidence in the future. You too can share in our PROFIT PARADE. Write us about your objective and the amount you want to invest, we will be very glad to have you join our group of investors, who are daily CASHING IN on Willoughby KNOW HOW. ALL inquiries and transactions strictly CONFIDENTIAL.

MINIMUM ORDER \$100.00. Add postage and insurance.

California residents add 4% sales tax.

SPACE CITY NUMISMATICS INC.

announces

Operational Policies

WHAT is Space City Numismatics, Inc? What does Space City Numismatics, Inc. do? These questions have been asked by many and the following is an attempt to explain the purpose and functions of Space City Numismatics, Inc:

Space City Numismatics, Inc. was originally formed for the purpose of buying and selling coins for a group of coin investors and operating through the facilities of a single teletype machine, within our own offices. Later an attempt was made to get into the retail coin business; however, after several months, it was decided that this was not the proper procedure to follow. Because of this, we took immediate steps to dissociate ourselves from the retail phase of our business. Dick Muniz therefore returned to his store in Florida, and the removal of our teletype was initiated.

Since the American Numismatic Exchange is housed in the same building as our offices it was the misunderstanding of many that we took undue advantage of their facilities . . . this is a misconception . . . Space City Numismatics, Inc. is a completely independent company and has little more direct connection with the American Numismatic Exchange teletype service than any other coin dealer in the country! The decision to discontinue our own teletype service, formally A-40, was made in late January of this year and was done so for the purpose of avoiding any conflict with other American Numismatic Exchange members.

Victor L. Sandlin, Vice President Space City Numismatics Inc., and Virginia S. Lemmon, Executive Secretary.

Space City Numismatics, Inc. has no retail store and does not anticipate opening one, at least for the present.

Space City Numismatics, Inc. is one of five corporations with the parent company being Space City Investments, Inc. All corporations are governed by a common Board of Directors and advised by a six member executive committee who are themselves members of the Board of Directors. Executive Vice President of

Space City Investments, Inc. is Roger M. Johnson. Within a few weeks all five companies will be moving into our own two story building which will be located at 4409 Montrose Boulevard, Houston, Texas. We invite you to come and see us when in this fabulous city of Houston . . . "The Nation's 6th Largest."

We purchased the American Numismatic Exchange in its infancy, headed by Roger M. Johnson, which is the largest nationwide teletype exchange. PACE, the Coin Financial News Weekly, was created by us and is under the directorship of D. Wayne Johnson; there is, however, no relation between the two heads of these companies. Houston Group Investments, Inc. is under the direction of Alonzo Schilling and is the Real Estate arm of our corporation. Harold B. Metcalf joined us the first of the year and is Vice President of Space City Investments Diversified.

NOTICE TO ALL: Space City Numismatics, Inc. is very much in the coin business.

Should you need a quantity of any particular item we are here to serve you — we buy and sell coins every day! — We are in the market for large collections of rolls and rare single coins.

Applications are being accepted for a coin man to be added to our staff and any qualified person interested in joining a fast growing company in the fastest growing city send a complete resume to the following address:

PACE Coin Investment News

Canadian Proof-Like Sets Cut Off

IN an unprecedented move, the Royal Canadian Mint, Ottawa, cut off the acceptance of orders for proof-like sets and proof-like dollars last week.

Previously orders were accepted until October 31 each year. This move by the Canadian mint officials advances the cut off date by five months.

Earlier estimates of 1964 proof-like set production of one million is now expected to reach 1.6 million. The great interest in Canadian proof-like sets is attributed to the early cut off of U.S. proof sets and the fact the new Charlottetown

silver dollar is issued separately and in the set.

Demand for proof-like dollars and sets has also been prompted by the rather poor strike of the new commemorative dollars for general circulation according to prominent Canadian numismatists.

Also, demand for the silver dollar has been created because Canadian silver dollar bags now contain \$1,000. One hundred dollars were in prior bag quantities.

The distribution of the Kennedy half dollar is still receiving criticism in isolated localities throughout the nation.

The shortage in New Brunswick, N.J., for example, caused the newspaper there, the New Brunswick Daily, to carry an editorial asking for the Treasury to take some unprecedented steps.

The editorial writer asked for a 1964 mintage of 180 million half dollars based on the assumption the mint could strike that number since 45 million were made in the first three months of the year.

It also suggested the Treasury continue to stamp half dollars bearing the 1964 date in the years to come. The writer added this action "might require

Congressional backing."

The third suggestion was a repetition of an earlier request to have the Post Office sell the coins over the counter at face value.

* * *

"Brown and Dunn" — the standard book on grading U.S. circulated coins has just been published in its fourth edition.

Named after its two authors, Martin R. Brown and John W. Dunn, both of Oklahoma, the term "Brown and Dunn" has come to mean accepted benchmarks in the difficult craft of coin grading in the numismatic field.

The 206 page book describes each type of U.S. coin—some 83 types including gold and the new Kennedy half dollar.

It describes the condition for six categories for each type: good, very good, fine, very fine, extremely fine, and about uncirculated.

Each condition is illustrated with a line drawing—a diagram—with frequent pointers indicating the critical areas of wear. The word descriptions are in non-technical language.

The book is titled "A Guide to the Grading of United States Coins," and retails for \$1.75.

Space City Averages:

How They Are Obtained

With close to 1,500 separate statistics appearing each week in PACE, a need exists to express this information in graphic form for busy readers.

We are currently charting eight different coin series each week as you see below. These charts are based on Space City Averages, an arbitrarily chosen group of rolls which we feel are representative of the total for that series.

To be included in the Space City Averages rolls are chosen on the basis of three factors: (1) their trading is constant, (2) they are widely held, and (3) they are indicative of the series.

It is obvious infrequently traded items, closely held items, and extremes in the series would not serve this purpose.

Each week the statistical staff of PACE prepares these averages from the information obtained on The American Numismatics Exchange transactions.

The amount expressed in the Space City averages is the total market bid prices for the rolls included in the averages. This is a dollar figure and is compared with previous week, month, and year figures for analysis.

The high and low for 1964 is also shown.

Charts by Richard Pevey

CENTS

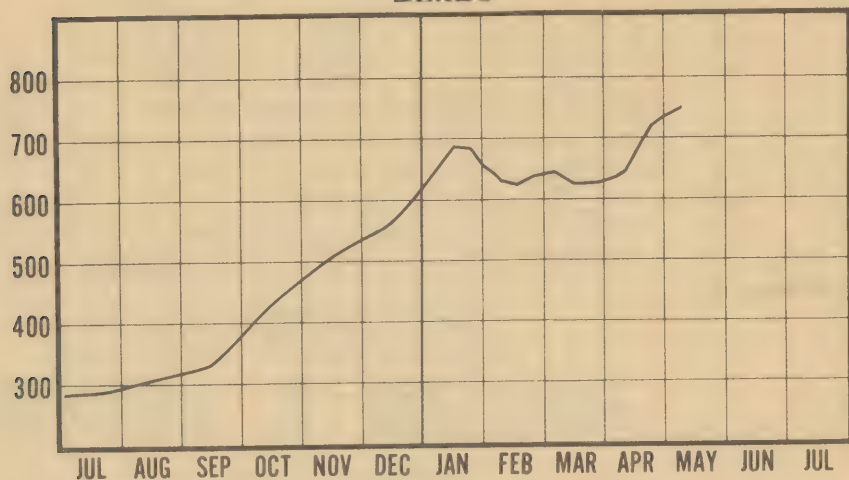

The following BU rolls were used in the calculation of the Lincoln cent averages: 1935-D, 1935-S, 1936-D, 1936-S, 1937-S, 1938-D, 1938-S, 1939-D, 1939-S, 1940-D, 1941-S, 1942-S, 1948-S, 1949-S, 1950-S, 1951-S, 1952-S, 1954-P, 1954-S, 1955-S.

NICKELS

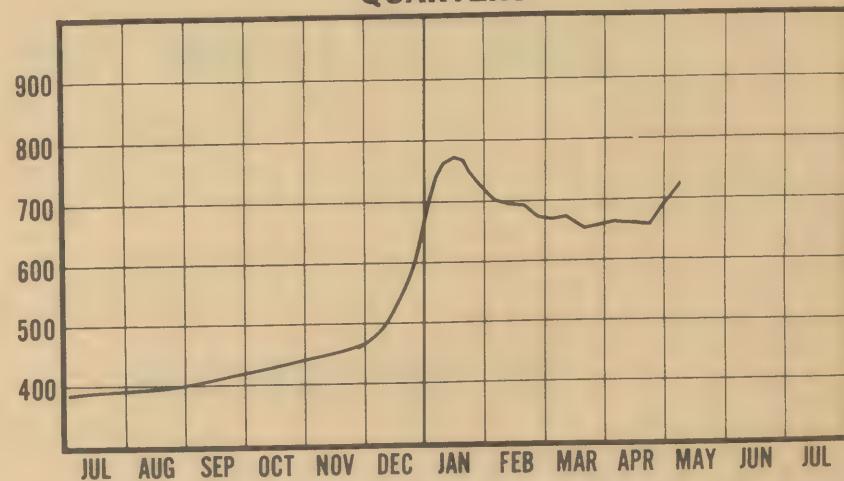

The following BU rolls were used in the calculation of the Jefferson nickel averages: 1938-D, 1938-S, 1939-S, 1946-S, 1948-S, 1949-S, 1950-P, 1950-D, 1951-S, 1955-P.

DIMES

The following BU rolls were used in the calculation of the Roosevelt dime averages: 1946-S, 1947-S, 1948-S, 1949-D, 1950-D, 1952-S, 1954-S, 1955-P, 1955-D, 1958-P.

QUARTERS

The following BU rolls were used in the calculation of the Washington quarter averages: 1946-D, 1946-S, 1947-D, 1947-S, 1949-D, 1950-S, 1951-S, 1953-P, 1953-S, 1954-P.

Roosevelt Dimes . . .

mately 15—20%, all rolls could have been acquired close to face value during those years. Subsequently the entire series showed good appreciation.

All 1956 to date rolls are selling at modest premiums with the exception of 1958-P. Few price gains have been recorded in this price group in spite of a general price advance in earlier Roosevelt dimes.

It is entirely possible to see this recent vintage price group come to life within the next few years in a manner reminiscent of the 1946 to 1953 performance.

Price Vs. Mintage

The price vs. mintage relationship of Roosevelt dimes does not present a clear cut picture as is often the case for other coins. The price structure of the earlier years is of reasonable proportions however.

Three price groups emerge distinctly:

Group I—coins which can be considered as setting the pattern for optimum prices.

Group II—comprising coins with attractive characteristics and a possible upside price potential.

Group III—coins of recent vintage, unweathered in market performance.

It is difficult to forecast price action for a series just moved into new high price grounds, even when this price move is justified by overriding fundamental factors.

The market for Roosevelt dimes will be strongly influenced by price factors in other series. Its current favor with the coin investment public is due to a long period of indifference which preceded the price move.

The key factor is the degree of public acceptance of higher prices compared to other coins. If

an orderly market is maintained in the near future while the remaining numismatic market moves upward, the public may continue to realize the investment appeal of the Roosevelt dime.

Should prices advance in a disorderly fashion or signs of excessive speculation appear, it may well be that the Roosevelt dimes could experience another severe sell off comparable to 1960. It should be remembered that it took the market two years to recuperate during that period.

In any event the astute coin investor should not follow steep price advances but should limit his commitments to period of consolidation.

Solon Wants Montana Mint

A bill to provide for the establishment of a mint in Montana was introduced in the Senate, April 28, by Lee Metcalf (D-Mont.).

"Silver, copper and nickel," said Senator Metcalf, "metals used in the production of U.S. (coins)—are found in great abundance in Senator Mansfield's and my State of Montana.

"Unemployment is also a problem there. Due to automation and new methods in Montana's major industrial complex, the Anaconda Co., many of our State's trained industrial workers are out of work . . .

"Recent testimony before the Banking and Currency Committee concerning my bill S.2671, to decrease the silver content

in silver coins, revealed that there is a great need in this country for additional minting facilities.

"Approximately 4.1 billion coins will be minted this fiscal year. But we will need an annual production of at least 5.1 billion by 1970, 9.6 billion by 1980.

"The shortage in minor coins at the present time is the most

critical in the history of the mint. The demand is increasing at a rate that has outstripped the capacity of both existing mints, even at three-shift, seven-day operations.

"Even with the planned expansion of mint facilities in Denver and Philadelphia, we will continue to run behind in

production of needed coins.

"One of the major objections to the minting of more silver dollars—which we in Montana and the West love so well—is that their minting would interfere with the minting of smaller coins."

Senator Metcalf's bill for a mint in Montana is S.2779.

American Numismatics Exchange Transactions

BU Roll Prices as of Thursday, May 7, 1964

These bid and asked prices, from the American Numismatic Exchange Inc., do not necessarily represent actual transactions. They are a guide to the range within which these coins could

have been sold (indicated by the "bid") or bought (indicated by the "asked") at the time of compilation. Price changes are obtained by comparison of weekly bid prices.

* Prices are wholesale quotations compiled from the American Numismatic Exchange teletype system which serves 195 coin dealers across the country.

I'M HITTING THE CONVENTION TRAIL.

and much as I'd like to, I simply can't carry my entire stock with me this summer, so am reducing my stock

and reducing my prices at the same time. Check these tremendous buys:

KENNEDY HALVES

"P" \$15.00 roll
"D" \$13.00 roll

Call for large quantities—
lower prices.

1961-1962 PROOF SETS

Have one lot of 100 sets at
\$500, can fill a few orders for
10 sets for \$51.00.

1963 D HALVES

BU roll \$ 12.00
BU bag \$1125.00

(express collect)

UNSORTED "S" ROLLS

Ave. circ. rolls of "S" coins,
dates as found:

Jefferson 5c \$ 3.25
Roosevelt 10c \$ 6.50
Washington 25c \$11.00
Franklin 50c \$12.50

FRANKLIN HALVES

CIRCULATED ROLLS

1951-S \$11.00
1952-S \$12.25
1953-S \$14.50
1954-S \$12.25

AU "Look Unc."

DIMES

1949-S ... \$6.00 ea.
1951-S ... \$3.00 ea.

WAR NICKELS

Circ. roll set \$47.50
BU Gem roll set \$1300.00

SILVER DOLLAR BAGS WANTED

Will pay \$1035 for any bag of
\$1,000 silver \$\$\$ Plus express.

CONVENTION SCHEDULE

See me at my bourse table at the
following conventions this summer:

June 4-7 Reno, Nevada
June 13-14 Pomona, Calif.
June 26-28 Galveston, Texas
July 3-5 Miami, Florida
July 16-18 Birmingham, Ala.
Aug. 7-9 Kansas City, Mo.
Aug. 14-16 St. Louis, Mo.

TELETYPE BROKERAGE SERVICE — UNTIL June 1, I will buy or sell any item on the
ANE teletype for you for a 3% commission, depending on the size of the transaction.

RON DOUGLAS

S. 2506 Sunrise Spokane, Wn. 99206

Phone 1509 9240583

WHO'S WHO AT A.N.E.

INTRODUCING:

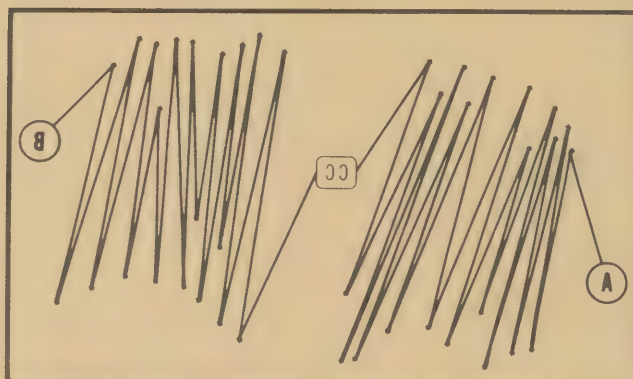

A.N.E. is the American Numismatics Exchange. It is the network of 192 coin dealers, tied together through teletype, buying and trading with each other. A.N.E. members are strung along a 22,000 mile net, many of whom never see the personnel

that keep the messages flowing. This is an introduction of A.N.E. personnel. Left to right: Pete Massie, teletype operator; Mary Rice, teletype operator; Hester Herrick, secretary; and Julia Pevey, statician.

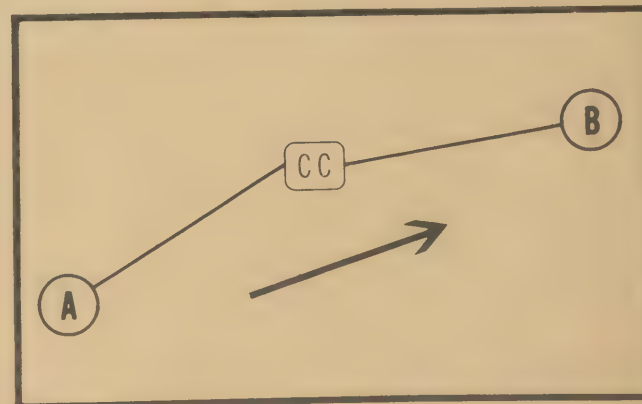

Roger Johnson, Executive Vice President, Space City Investments, Inc., and Vice President A.N.E., and Douglas Stringfellow, Systems Engineer.

FURTHER ADVANTAGES OF THE NEW "7740"

The present system explained above is simply a limitation of the present equipment. Teletype networks revolutionized coin trading and the coin market. But there are many occasions when dealer "A" wishes to get a message **ONLY** to dealer "B", and does **NOT** want a "party-line" conversation. Now A.N.E. introduces a new factor . . . the ability, with the IBM "7740 computer", of going directly from "A" (to the Control Center) and directly from there to "B". There are many other advantages. This is only one.

The present 192 A.N.E. dealers are of necessity divided into seven "circuits". This means that there are about 28 dealers on each "circuit". When a message goes from dealer "A" to dealer "B", it goes from dealer "A" to a CONTROL CENTER, and from there is directed to dealer "B". However, in going from dealer "A" to the CONTROL CENTER, it also goes through the other 28 dealers on that particular "circuit". In getting from the CONTROL CENTER to dealer "B", it also goes through another 28 dealers on THAT circuit.

Offers **STANLEY KOPKIN** Offers LAYAWAY LAYAWAY

A new service to our clients. A layaway plan whereby you can purchase any item in my ad. It's really quite simple:

Any item may be purchased on our layaway plan at 10% over our advertised prices. On layaway purchases, merely add 10% to prices. On layaway purchases, merely add 10% to prices shown below, then send your order with a deposit of 20% of the total amount. The balance may be paid in four monthly installments of 20% each. All items so purchased will be deposited in our vault and shipped postpaid, insured immediately upon receipt of final payment. We deliver the same high quality coins under layaway plan that we deliver under our regular mail order. **MINIMUM ORDER \$100.00.**

MARKET SUMMARY

May 7, 1964

By Russell Brown

THIS week found the market moving higher on an extremely broad front which seemed to encompass most current series. Six new highs were recorded for the year and of the 431 issues with which we are statistically concerned, which we are statistically concerned, only six were in decline.

Possibly the best volume of the week was to be found in proof sets. Price increases occurred in the middle dates of the current series and the 1964 rose a full dollar due to the disappearance of supply. The mint's slowup of proof set deliveries has much to do with this situation.

More volume was shown in the Morgan dollar series than for the past several weeks. Many of the issues selling in the \$50 to \$100 range were in demand.

There were also Morgans such as the 1892-CC, 1886-O and the 1891-P for which special interest was shown. The prices on these issues all increased a minimum of \$60.

With the impetus of several investment services recommending the 1878 7/8 tail feathers variety, this issue also enjoyed considerable popularity.

The high demand for the Washington quarter which began last week continued into this week with resultant increases in price. Largest gains were recorded by the 1946-S and the 1947-S, with \$22 and \$10 respectively.

Dimes rose again this week on

the strength of the key early dates which climbed in price almost without exception.

The 1950-S, 1949-P and the 1949-S dimes all moved forward by \$20 per roll or more. Certainly one of the best performing series, the dimes scored 16 advances against no declines.

Jefferson Nickels presented a mixed picture. There was only one decline against 11 advances. The demand for the nickels was slow and spread throughout the entire series. The major gain was by the 1950-P which increased in bid price \$20 per roll.

Lincoln cents were heavily in demand with only two declines in the observed portion of the series. Few rolls scored large increases but volume was high and offerings were quickly accepted and confirmed. The 1960-P small date

cent quieted in slow trading and decreased its bid price \$5.

Peace dollars were to a large extent an unpopular item this week with the exception of the 1925-S and the 1928-P which gained \$50 or more per roll. Volume was nonexistent in the series, however.

Franklin half dollars have quieted to a very slow pace and there is very little volume in the series. While some gains continued to be made by selected rolls, these price changes must be regarded in the nature of technical corrections.

These corrections will begin to take place with increasing frequency now that the series has almost run its course price-wise. The 1950-P half increased \$25 while the 1953-P decreased \$15. It was noted that only a very few dealers are continuing to participate in Franklin purchases.

The entire circulated market was very quiet this week and the only large price change was a \$40 per roll increase by the 1950-D nickel. Most other prices remained at their prior week's levels.

The news that Canadian proof-like set orders would no longer be accepted by Coins Unlimited caused little activity in the Canadian market except to raise the bid price of the 1964 sets to the \$4 level. The only other Canadian activity noted was in current date dollars.

The Market Opinion

It appears that we may soon enter an era which we will be dealing with a more sophisticated market. When we do, no longer will one series be run up for a period of a week or month and then dropped.

Rather, we will see an equal interest in all series simultaneously. Granted that there will be market favorites at times, but these favorites will not completely dominate the market, but instead, share a large portion of it with other series.

This week is the first that we have noted in a long period of time in which no one market leader dominated the tapes. We hope that in the future this situation will continue to exist.

A more orderly market is a more mature, a more stable market. When the day comes that we reach this level, the market's continuity will act as a major buffer against price variances.

Coin Market Fundamentals

Coins are listed by date and mint. Mintmarks follow the date in the list and are the same letter that appear on coins.

Unless indicated as "sets" or "circulated" all items listed on these pages are for Brilliant Uncirculated coins in standard count rolls.

Standard count rolls are as follows for each denomination:

Denomination	Number	Face Value
Cents	50	\$.50
Nickels	40	2.00

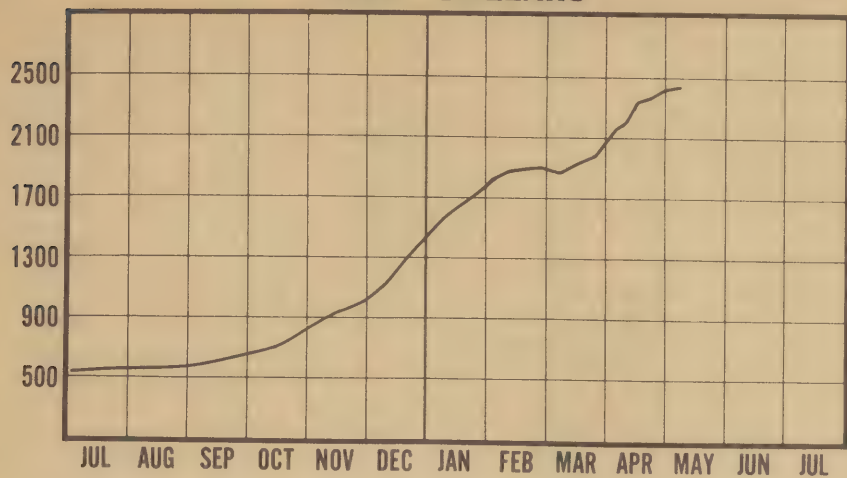

Dimes	50	5.00
Quarters	40	10.00
Half dollars	20	10.00
Silver dollars	20	20.00

Prices listed here are taken from the American Numismatics Exchange transactions and are dealer-to-dealer prices; in effect wholesale prices.

You could expect to sell at these prices, but to buy at retail, you should expect to pay slightly above these prices.

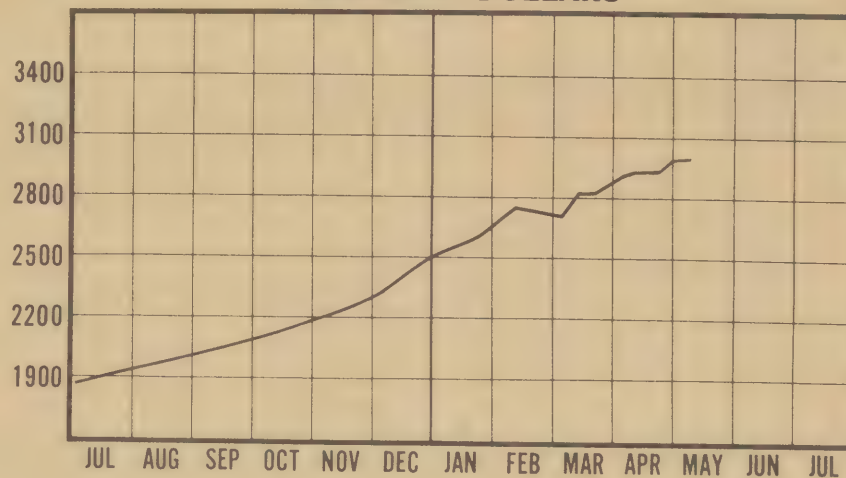

The "LD" and "SD" are varieties of the 1960 cent which were struck with large date and small date figures.

HALF DOLLARS

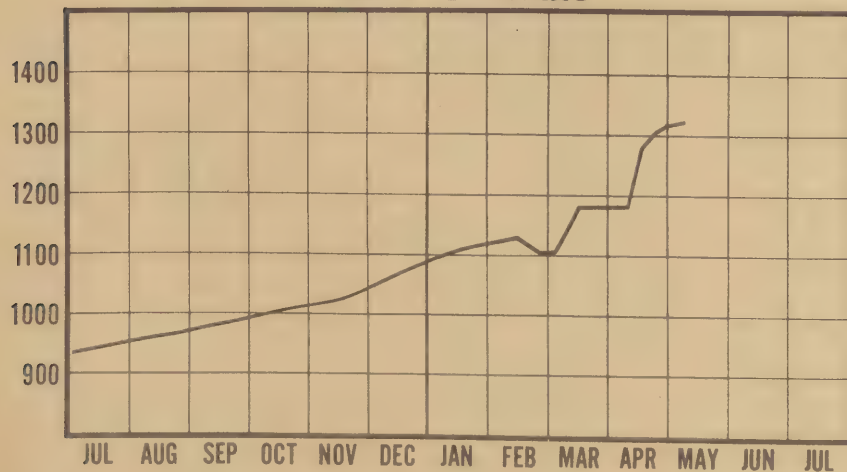

The following BU rolls were used in the calculation of the Franklin half dollar averages: 1948-P, 1948-D, 1949-P, 1949-D, 1949-S, 1950-P, 1950-D, 1952-S, 1953-S, 1954-S, 1956-P, 1957-P, 1958-P, 1959-P, 1960-P.

MORGAN DOLLARS

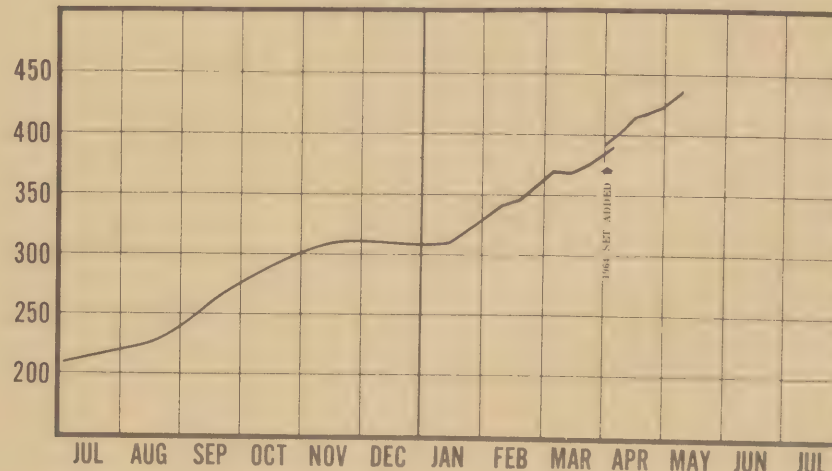

The following BU rolls were used in the calculation of the Morgan dollar averages: 1878-CC, 1879-O, 1882-CC, 1883-CC, 1883-S, 1885-S, 1890-O, 1894-O, 1897-P, 1897-O, 1897-S, 1898-P, 1901-P.

PEACE DOLLARS

The following BU rolls were used in the calculation of the Peace dollar averages: 1922-S, 1923-D, 1926-P, 1926-D, 1926-S, 1928-S, 1934-D.

PROOF SETS

All proof sets from 1950 to date, excluding the 1960 small date set, go to make up the proof set averages. The current year's set is added to the average on April first.

BU MORGAN DOLLARS

Have you tried to buy a bag of BU Morgan Dollars from your bank?
Have you tried to buy a bag of Circulated Morgan Dollars from your bank lately?
Even the slick circulated Morgan Dollars have been pigeon-holed!
We have decided to sell our bags and

THE REASON WE SINCERELY RECOMMEND THAT YOU BUY . . .
is because we think selling these dollars is another one of ...

FOSTER'S FAMOUS FOLLIES!

FOLLY NO. 1 We sold our Commemorative Halves
two weeks before they jumped 40 per cent!

FOLLY NO. 2 We sold our Proof Sets in February
this year! Nuff sed!

FOLLY NO. 3 We sold most of our 1899-P Dollars
at \$4.95 each!

FOLLY NO. 4 We sold most of our 1881-CC and
1885-CC Dollars at \$21.00 each!

FOLLY NO. 5 Join us in this one! We are paying
the air freight on these bags and remember, your banker
will give you the first \$1,000.00!

PREPAID AIR FREIGHT ON THESE BAGS!!

This is included in the price. Railway Express if you prefer.

Bags On Hand! Shipped Same Day Cashier's Check Received!
No Confusing Drop Shipments!

You may call collect to "freeze" a bag in your name and to
guarantee delivery.
